TOUCHKEY FULL-STACK ARCHITECTURE: GUI, CLI SCRIPTS, SQLITE STORE, TELEMETRY & 3-PHASE ENGINE PIPELINE (ADB -> OS DRIVERS)

LAYER 1: BOOTSTRAP, CLI SCRIPTS, ADB UTILITIES & DUAL-MODE DIALOGS (modules.scripts.* & modules.cli.*)

1A. Environment Preflight & ADB Discovery
modules.cli.cli_utils.check_environment() — Called by: cli_main()

check_adb()	Checks BIN_PCS_DEF/adb (ADB exists?) -> fallback shutil.which('adb') -> resolves absolute binary path
check_driver()	Win32: Interrogates() valid check	Linux: Path('/dev/uinput').exists() verification
Failure Reporting	Returns bool: logs actionable remediation (bus/chmod setup | sudo/chown setup | PC reboot)

1B. Platform Bootstrap & Uninstaller
bus/chmod setup | reboot | sudo/chown | qt5-x11-extras | cmpn_cpcpn-sh

Privilege Elevation	Win32: ShellExecuteW(None, 'runas', sys.executable, '-m ...');	Linux: pkexec (GUI) or sudo (CLI).
OS Driver Setup	setup_windows() installs Interception & platform-tools	setup_linux() writes /dev/uinput rules & loads uinput.ko
Desktop Shortcuts	Win32: PowerShell WScript Shell -> TouchOKey.lnk (pythonw.exe -m modules.gui.app)	Linux: touchokey.desktop (0o755)
Uninstall & Purge	store.close() -> _kill_adb() (taskkill/pkill) -> install-interception.exe /uninstall or udev rm -> rmtree(BIN/CONFIG/LOGS/DIAGNOSTICS)

1C. ADB Screen Capture & Wireless Handshake
bus/chmod setup | reboot | sudo/chown | qt5-x11-extras | cmpn_cpcpn-sh

Device Matrix	get_adb_devices() -> _get_device_dpi() (get_dpi()) or 'adb shell wm density'; fallback BASELINE_DPI = get_relative() + relate_resolution()
ADB Screencap	adb shell screencap -p /data/local/tmp/temp_cap.png (30s timeout) -> adb pull (30s) -> finally: adb shell rm
PIL & Layout Sync	Image.open() -> img.load() (releases Win32 file lock) -> img.save(script_dpi.png) -> store.layouts.update(dpi: image_path, w, h, dpi)
Wireless ADB	CLI: wireless_connect(ip:msg) -> tcpip(5555) -> sleep(2) -> connect() -> get_devices()

1D. CLI Layout, Profile & Settings Manager
bus/chmod setup | reboot | sudo/chown | qt5-x11-extras | cmpn_cpcpn-sh | cmpn_cpcpn-sh | cmpn_cpcpn-sh
